Re: Mine Pond Plans

Dear Mr. Glazier:

As indicated in the Utah Water Pollution Control Committee's letter to you of March 27, 1986, we do not have the design information on the 5 M Inc. wastewater ponds at Leeds. The company's response of April 11, 1986 and subsequent conversations in June and November 1986, indicated previous communications with the State Division of Environmental Health but there is no evidence of formal plans being submitted or approval given.

Since the ponds are still in use, we again request that the company submit within two weeks, plans and design information on the wastewater ponds. Copies of these plans should be submitted to Wayne Thomas at 354 East 600 South, Suite 301, St. George, Utah 84770, and to this office.

Sincerely,

UTAH WATER POLLUTION CONTROL COMMITTEE

Calvin K. Sudweeks
Executive Secretary
